

ClearToolbars

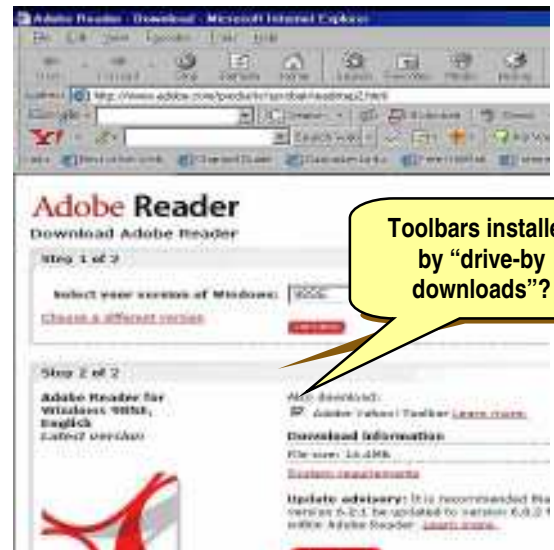

Crandun Technologies Inc.

ClearToolbars

- Overrun with Internet Explorer toolbars?
- Slow computer performance?
- Crashes? Normal software doesn't work?
- Can see the browser window anymore?
- Removing toolbars constantly, but they come back?

You may be the victim of toolbar overload!

Google™, Yahoo®, Altavista™, MSN® – everybody has a toolbar – and everybody wants *their* toolbar at the top of *your* browser window! Even essential software, such as Adobe Acrobat Reader®, installs a toolbar by default. This leads to slow performance, spyware installation, crashes, and simply no space left in the browser window to see what you really want to see!

Crandun Technologies ClearToolbars software runs in the background and reliably removes toolbars without any user interaction. It keeps your computer clean, improving performance and usability.

Features

- ✓ Low cost. Easy to install. Continuous protection.
- ✓ Low overhead – negligible performance impact.
- ✓ Runs on all systems – even older models with limited memory, etc.
- ✓ Supports all Windows® versions – '95 through XP

Help keep your systems usable – see our website www.ClearToolbars.com, or contact us at (905) 692-0012 for more information
